5. NEW BUSINESS:

Pontiac Complete Streets Presentation presented by
Jennifer Lucarelli, Kristen Wiltfang and Norm Cox.

Ms. Lucarelli explained that this program is to help
promote and improve and make it safer for non-
motorized transportation, and implement alternative
transportation mechanisms throughout the City.

She further explained that grants have been received
from the Centers for Disease Control and Prevention
for the City to promote a variety of health
initiatives, and as part of that funding included the

development of a non-motorized transportation plan.

Mr. Cox explained that this plan is also looking at people who drive, and looking at the safety of all the users on the roadways. He explained how this plan is developed to look at motorized/pedestrian accidents, as well as the health aspect of promoting physical activity by having safer roadways for cyclists and pedestrians to utilize.

Mr. Cox further explained various groups gathered to discuss the challenges in the City, which included mobility issues, sidewalk issues, snow issues, physical barriers, the Clinton River Trail surface, personal safety with stray dogs, overgrown vegetation, street lighting and traffic safety.

Mr. Cox explained the cost benefit analysis of implementing this plan.

Mr. Cox explained there would be 80 crosswalk improvements. They identified 5 miles of critical sidewalk gaps. He indicated they would improve and/or add 20 miles of shared use pathways and trails, 26 miles of neighborhood connector routes using local roadways and routing signage, adding 12 miles of bike lanes, including buffered bike lanes. He indicated some roadways/areas would have to wait until they were ready for a reconstruction project.

Mr. Cox explained all the funding sources that are available.

Ms. Lucarelli explained the upcoming sidewalk audit that they will provide to the City, and also touched on potential funding sources. She explained the bike rack initiative, as well.

Commissioner Parlove expressed her concern about the motorist/pedestrian accidents which happen near where she resides, and inquired if there is anything they can do to slow people down in areas like that.

Mr. Cox explained they have seen these crash patterns happen in a multitude of areas, and that they try to address those, if possible. He explained changing the character of roadways is the most important way of slowing speed.

Chairman Thomas applauded the group for their efforts, and indicated everyone needs to pull together to make this a reality.

Commissioner Northcross also applauded the group, indicating that they have captured all the important items, plus more, things he had never thought of. He indicated he's an avid cyclist. He indicated that the Planning Commission should task themselves to set a deadline, perhaps a month, for developing a work plan to make amendments to the Master Plan that incorporate these suggestions.

Mayor Waterman indicated this was an excellent report. She indicated the Planning Commission can immediately adopt and amend the Master Plan. She indicated when the 2014 Master Plan was amended, there were several components not completed, including the non-motorized plan.

Chairman Thomas inquired of Mr. Sabo if the Commission could take this to vote as a resolution this evening.

Mr. Sabo's recommendation was he would bring a resolution to the September meeting based on the information presented and it can be an official action item to the Master Plan.
